

ATT Broadband recently implemented their annual increase to my Cable TV subscription fee. However simultaneous to the price increase they also restructured their premium channel packages and removed several channels from the old premium cable package I subscribed to, and moved them to their new "Digital Cable" package (much higher priced) which I do not subscribe to. This has caused me much distress and since I do not want to pay the higher fees for digital service nor the high installation charges, I'm left with less services for a higher price.

I thought the merger of ATT Broadband with Comcast was supposed to increase service and lower costs to consumers, based on their merger application documents filed with the FCC. THIS IS CERTAINLY NOT WHAT I EXPECTED AS A CONSUMER AND I WOULD ASK THE FCC TO CALL ATT-BROADBAND ON THE CARPET FOR THIS AGGREGIOUS PRICE GOUGE.
